Satellite Committee

Services Division

25X1A9a

At the meeting of 10 April, [REDACTED], S/OM discussed recent reorganizations in the economic administration of the Satellites. The Satellites have been following the earlier Soviet and Yugoslav models of economic reorganization, particularly in the measures aimed at decentralization. In addition, Satellite economic reorganization has involved simplification of the managerial chain of command, elimination of duplicating units, and delegating a measure of planning from central to lower level officials.

At the meeting on 17 April, the Committee will discuss current news items.
